***One Voice for Manufacturing Applauds House Passage of \$78B Tax Relief for American Families and Workers Act; Urges Senate to Act Swiftly***

*Cleveland, OH* –The National Tooling and Machining association (NTMA) and the Precision Metalforming Association (PMA) through their combined advocacy effort, One Voice for Manufacturing, today applaud the U.S. House of Representatives for passing the *Tax Relief for American Families and Workers Act*. The bill, which restores several important tax provisions for small- and medium-sized manufacturers is supported by NTMA and PMA members as an essential element for continued economic growth and ensuring American manufacturers’ competitiveness in the global market.

NTMA and PMA commend House Speaker Mike Johnson (R-LA) and House Ways and Means Committee Chairman Jason Smith (R-MO) for their leadership and recognize the broad bipartisan coalition that voted for this important bill. Both associations look forward to working with champions of manufacturing in the U.S. Senate to keep up the momentum and pass this bill for America’s manufacturers.

“We are very pleased with the passage of the *Tax Relief for American Families and Workers Act* in the House, as the bill recognizes the vital role that small- and medium-sized manufacturers play in creating jobs and spurring economic growth,” said NTMA President Roger Atkins. “We encourage the Senate to take up and pass this bill quickly in order to enable manufacturers to prioritize investing in the future.”

“PMA is dedicated to fostering the long-term growth and success of manufacturers, and this bill does just that,” said PMA President David Klotz. “When manufacturers can reinvest in their businesses, they can create new job opportunities, drive innovation, and increase American competitiveness and leadership. This has never been more important, and we urge the Senate to swiftly pass this bill.”
